

# Detect, respond and keep your business moving.

Coping with cyber threats in today's world.

## Most organizations struggle to detect threats.

**27%** of all breaches were discovered by third parties

**85%** of all breaches in the accommodation and food service industry are discovered by fraud detection.

## Improve your threat detection and response.

**Technology** Tools to help you investigate and alert.

**Personnel** Security experts available anytime, anywhere.

**Information** Actionable intelligence for quick remediation.

## Cyber attacks move fast.

In breaches where we know the time variable,

**82%** of compromises occurred in minutes or less.

## Response time is slow.

**42%** of breaches for which we know the time variable took months or years to discover.

**The more time attackers have, the more damage they can do.**

## We can help.
