

# Detect threats before they seriously damage your business.

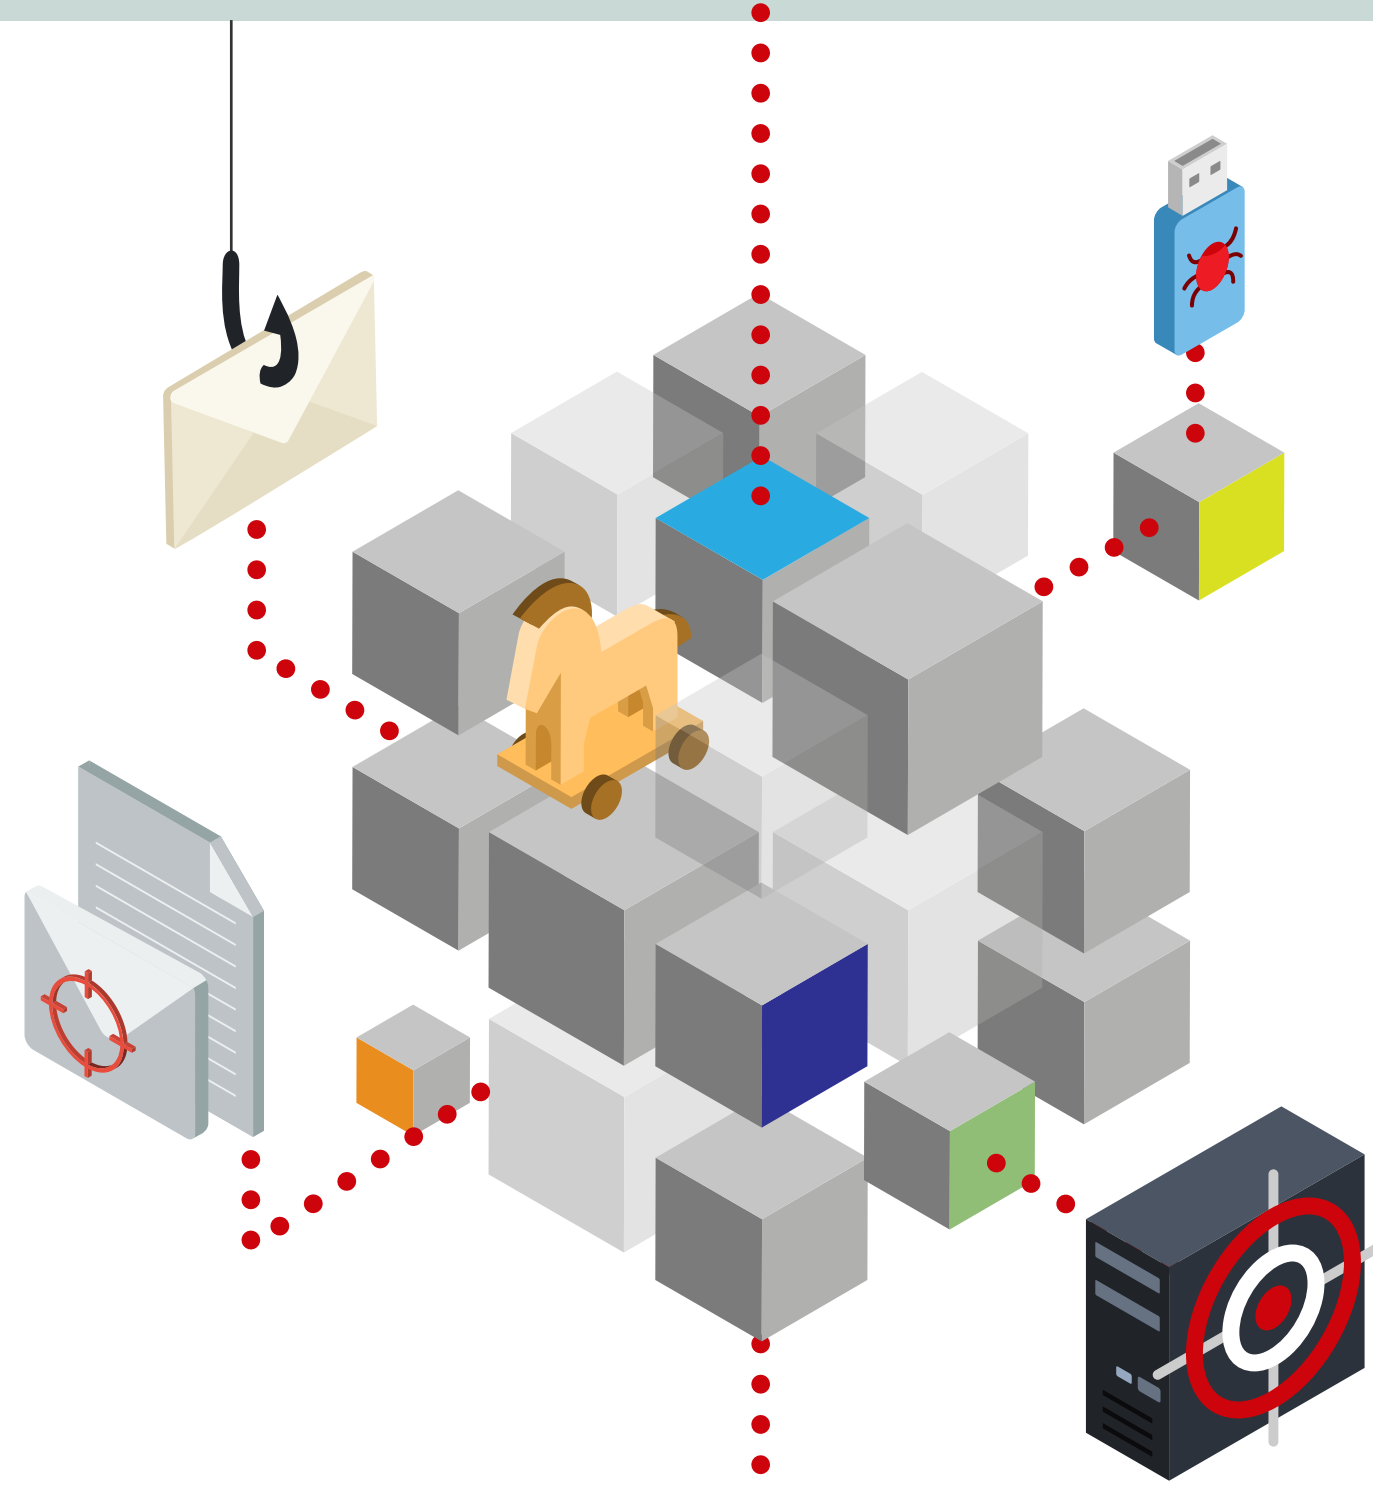

There are more new cyber threats emerging today than ever before. Do you know how to spot the ones that are most likely to impact your business, so you can respond faster?

## Managing cyber security has never been more complex.

An increasingly connected world—driven by cloud and mobile—and a dramatic rise in cyber crime have made incidents harder to detect.

According to our research:<sup>1</sup>

**93%** of compromises happened in seconds.

**83%** took weeks or longer to discover.

## Businesses are facing real challenges.

In a recent Forrester survey,<sup>2</sup> enterprise security decision makers identified the same pain points.

75% Changing and evolving nature of IT threats

71% IT environment complexity

65% Unavailability of security staff with the right skills

## To keep up, you need to catch incidents early in the attack chain. Do you have the right resources and technologies in place?

### Verizon Managed Security Services can help.

By analyzing data sent from your security devices, we can flag the threats that are most likely to disrupt your business and deliver actionable insight to your IT team.

That means you can:

Effectively manage risk and maintain continuity.

Close the gap between time of compromise and time to discover.

Free up internal IT staff to focus on more strategic initiatives.

Address security compliance requirements.

See beyond network and edge threats you already know about.

Control the operational cost of threat detection.

## The experts at our security operations centers have the knowledge and expertise to help you mitigate risk and maintain continuity.

**20+**

years of security industry experience

**12B**

Access to data covering more than 12 billion analyzed, correlated and assessed events

**Gartner.**

Named a leader in the 2017 Magic Quadrant for Managed Security Services, Worldwide<sup>3</sup>

## Uncover the threats that really matter.

Find out how we can help you identify new threats quickly and give your security team the insight you need to mitigate risk more effectively. For more information, contact your account representative or visit:
